

CNC Programmer-Operator

We are currently seeking candidates for the position of CNC router programmer-operator here at Dillon Works.

Dillon Works is a premier custom design and fabrication company located in Mukilteo, WA, just north of Seattle. We specialize in the design and development of the more adventurous of architectural and themed environments and embellishments and our motto fits our focus "The design and fabrication of almost anything".

The ideal candidate will have an extended, successful track record of designing 2D, and 3D tool paths, and the set-up and operation of CNC Routers. This includes creating 2D geometry and 3D models for generating tool paths in Rhinocam software and cutting custom parts in wood, plastics, composites, etc. on our Multicam router. Proficiency creating 2D geometry and 3D models in SolidWorks, Rhino, AutoCAD or Rhinocam required. This is a fulltime staff position with employee benefits.

For more information about what we do at Dillon Works, visit our website at www.dillonworks.com. Please forward resume to job@dillonworks.com. No phone calls please.
